RETAIL CATALOGUE

There are two VAT inclusive prices listed in this catalogue for each item. The first is our normal price, the second our members discount price.

Beebug Retail . . . Beebug Retail

BEEBUG LIMITED

BEEBUG was formed in 1982 at the same time as the original BBC Micro was launched. The founders recognised that some form of association would be of immense value in helping users gain maximum benefit from their investment, and hence BEEBUG - The Independent National User Group was formed. As one of Britain's largest Acorn dealers BEEBUG is in Acorn's Premier League and can now offer the Archimedes range including the new BBC Micro. BEEBUG is also an approved Acorn Econet Centre and can supply complete systems tailored to your own individual requirements and budget.

Acorn equipment is only a part of the marketplace, and to cater for those users who would prefer to deal with a single reliable supplier, our range now includes the Z88 and PC compatibles such as Amstrad, Commodore, together with upmarket ancillary equipment such as Laser printers and Facsimile machines.

AFTER and PRE-SALES SUPPORT

BEEBUG believe that a technical advisory service is crucial both prior and after purchase. Although this service is available to all purchasers and prospective purchasers, BEEBUG offer an enhanced service to members at no extra charge. Our technical support team may be contacted by telephone, post or when making a purchase at our showroom and will endeavour to resolve any problems that you may have with software (other than programming) or hardware, and will also provide impartial advice on suitability and compatibility of any equipment. As part of the after sales support we have our own Engineering workshop for repairs of equipment.

SHOWROOM

We have our own large showroom in St Albans with easy parking, only a few minutes walk from St Albans City station. Here you may come and talk to us personally for informed and impartial advice, try out the latest hardware and software in a calm and unruffled environment.

MAIL ORDER

Our efficient mail order service guarantees despatch of your order within 48 hours (subject to products being in stock). Our large storage facilities mean that most products are constantly in stock. All items are sent fully insured, and we can offer 24 or 72 hour courier delivery if required.

Ordering by phone or Fax - using credit cards

We accept Access, Visa, Switch and Connect cards
24 hour phone line: 0727 40303
24 hour Fax line: 0727 60263

Please supply (or be ready to supply):

- Cardholder's name
- Card number
- Card expiry date
- Delivery address if different
- Your daytime telephone number (in case a query arises)

Ordering by post

Please complete the order form, and keep a copy if possible.

Post to:
 BEEBUG Ltd, 117 Hatfield Road,
 St Albans Herts AL1 4JS

Callers at the Showroom

Showroom hours are: 9:00am - 5:30pm Mon - Sat
 Additional late night opening until 8pm on Thursday.

SOME OF THE NEW PRODUCTS FEATURED IN THIS CATALOGUE

- Amstrad LQ5000/3500di** Two new, competitive priced 24 pin printers.
- Arcade Soccer** Arcade football from The fourth Dimension
- Artisan II** RISC OS version of the best selling art package
Upgrade from version 1 available
- ARM 3** The board that will turbo charge your Archimedes
- Commodore PC's** High performance quality PC's at sensible prices
- E-Type** The Fourth Dimensions RISC racing simulation game
- Epson LQ400 / LX400** LX400 budget 9 pin NLQ printer
LQ400 Budget 24 pin Epson printer
- Holed Out** Two discs of additional courses for the arcade golf game have
now been released.
- !Inspiration** The powerful multi-tasking MIDI package
- Master 128 System ROM** New upgrade for the Master 128 Operating System
- Multistore** New Multi-tasking database from Minerva.
- Multi-Vision 770+ Low Ration** The 770+LR for this month only is available at the same cost
as the normal 770+
- The Olympics** Arcade game with impressive graphics on the old theme.
- VIKING II Monitor** The incredible new mono Multi-sync from Taxan.
- Z88 and Z88 Disc Drive** By popular request we are stocking Z88's again
The Ranger Z88 disk drive- uses PC format discs

ACORN SUPPORT DISC

The Acorn Support Disc contains a whole host of upgrade and new utilities. A useful upgrade to any RISC OS user.

FREE ON-SITE MAINTENANCE

Beebug is now providing free On-Site Maintenance (O.S.M.) with all new A3000 and Archimedes 400/1 series computers purchased from us. This offer is only available to members of Beebug and RISC User. No other Acorn dealer is offering this facility, which is a further commitment by Beebug to offer the best service and support to its members.

The Beebug OSM is for one year and includes:

- 24 hour response to your call
- Unlimited call-outs during the year
- Replacement equipment if fault cannot be rectified on-site (subject to availability)
- Additional cover for monitor £10 plus VAT
- Optional 3 year 'Peace of Mind' cover available
- Nationwide cover provided by Cray Electronics PLC under an exclusive agreement with Beebug.

This offer is only available to residents of the UK mainland. A copy of the full terms and conditions are available upon request.

NEW PRICES ON ARCHIMEDES COLOUR SYSTEMS

We are now supplying the Philips CM8833 colour monitor as standard with all Archimedes colour systems unless you would prefer the Acorn monitor. The CM8833 is the same resolution as the Acorn monitor, but also features stereo sound and can accept a video input. This offer does not affect the normal members extras available when purchasing an Archimedes, and a stereo audio lead is also supplied free of charge

9 Months 0% Finance

We have pleasure in offering you the opportunity to purchase an Archimedes or A3000 on our 0% finance scheme.

Under this scheme you may purchase an Archimedes A3000, 300 Series or 400 Series computer (base, mono or colour) by an initial deposit and 9 payments at monthly intervals. There is no charge to you for this service.

The table below shows some examples of the repayments on various machines.

Machine	Deposit	9 Payments
A3000	71.35	75.00
A3000 Colour	99.70	96.00
310	106.85	103.00
310 Colour	126.20	125.00
310M	112.85	110.00
310M Colour	132.20	132.00
410/1	145.85	137.00
410/1 Colour	165.20	159.00
420/1	198.85	195.00
420/1 Colour	218.20	217.00
440/1	290.85	287.00
440/1 Colour	310.20	309.00

If you wish to take advantage of this scheme please telephone us and we will send you further details.

Trade-in your Acorn Micro

Depending upon the age and condition of your computer we are able to offer a trade-in discount of up to £540 off the price of new equipment.

BBC Micro issue 4	110.00
BBC Micro issue 4 with DFS	160.00
BBC Micro issue 7	160.00
BBC Micro issue 7 with DFS	210.00
BBC Master 128	250.00
Master Compact Entry	190.00
Archimedes 310 Entry	540.00

By DFS we mean either the Acorn or WE DFS.

Beebug Retail . . . Beebug Retail

Archimedes 300 Series

The Archimedes 310 is fitted with Risc OS, 1 Mbyte of RAM and an internal 3.5" 800K disc drive.

0193G	310 Entry System	1033.85
0194G	310 Mono System	1102.85
0195G	310 Colour System	1251.20

The Archimedes 310M is supplied with the PC Emulation software which enables it to run MS-DOS. In business, MS-DOS is the most popular operating system and provides access to many thousands of applications programs.

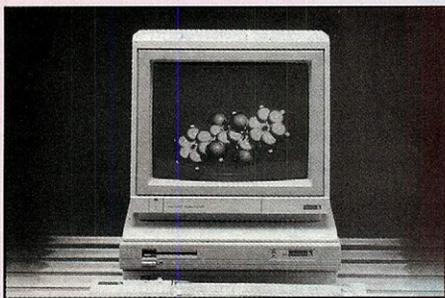

0257G	310M Entry System	1102.85
0258G	310M Mono System	1171.85

ARCHIMEDES 400/1 SERIES

The three new models in Acorn's Archimedes 400/1 series of powerful RISC-based desktop workstations offer typically, a 10% increase in processing speed and a full upgrade path across the range. **We are also now supplying the superior Philips CM8833 monitor with all colour systems (unless you would prefer the standard Acorn monitor).**

The **410/1** is fitted with 1Mb of RAM and has the hard disc interface fitted to the main board allowing easy upgrade to hard disc. The 410/1 can be upgraded to a maximum of 4Mb of RAM and has a four-way podule backplane and cooling fan fitted.

0260G	410/1 Entry System	1378.85
0261G	410/1 Colour System	1596.20

The **420/1** is similar to the 410/1 but has 2Mbytes of RAM and is fitted with a 20Mbyte hard disc drive.

0262G	420/1 Entry System	1953.85
0264G	420/1 Colour System	2171.20

The **440/1** is similar to the 420/1, except that it has 4Mb of RAM and is fitted with a 50Mb (formatted) hard disc.

0275G	440/1 Entry System	2873.85
0276G	440/1 Colour System	3091.20

MEMBERS BUYING AN ARCHIMEDES SYSTEM WILL RECEIVE ABSOLUTELY FREE:

- 310** - PC Emulator, Printer Lead, Ten 3.5" discs & Lockable disc box.
- 410/1** - On-Site Maintenance, and items to the value of £110 (Entry system) or £123 (Colour system).
Members using the 0% finance offer receive free On-Site maintenance only.
- 420/1** - On-Site Maintenance, and items to the value of £167 (Entry system) or £180 (Colour system).
Members using the 0% finance offer receive On-Site maintenance, 10 x 3.5" discs.
- 440/1** - On-Site Maintenance and items to the value of £259 (Entry system) or £272 (Colour system).
Members using 0% finance receive free On Site Maintenance, 10 discs & box plus either £45 or £65 in goods.

FLOATING POINT CO-PROCESSOR

The Acorn floating point co-processor is now available. This expansion card will only operate on a 440 (fitted with MEMC 1A) or a 400/1 series computer. A must for serious number crunching.

Members Price £656.05
Stock Code 0265G

MEMC 1A UPGRADE

Increase the speed of your 305, 310 or 440 by 10%

This simple upgrade will increase the operational speed of your Archimedes by about 10% and is also necessary for Acorn's SCSI interface. An official Acorn upgrade which Beebug will fit free of charge. This is the same IC as used in the A3000 and A400/1 series.

Members price £75.38
Stock Code 0236C

FOUR NEW MAJOR UPGRADES FOR THE ARCHIMEDES

310 MEMORY UPGRADES

At long last 310 users can upgrade their machines to either 2 or a massive 4 megabytes of memory with Computerware's excellent memory expansion boards. This upgrade does not require any modifications to the computer as it simply plugs into sockets already existing on the circuit board. The extra memory is all accessible to the user just as the standard 1 Mb is.

The new MEMC 1A chip must be fitted. Please contact our technical sales department for more detailed information on these high quality upgrades. Free fitting if required.

AVAILABLE DECEMBER 1989

310 MEMORY UPGRADES

0222D	310 1 Mb upgrade	399.00	380.00
0223D	310 3 Mb upgrade	699.00	665.71

ARM 3

The new ARM 3 upgrade from Aleph One will dramatically increase the speed of your Archimedes 300 or 400 series computer. Features include:

- Uses on-chip 4k RAM Cache
- No compatibility problems
- Desktop software to switch caching on & off
- Most Basic programs run up to 300% faster
- Optimised code can run up to 700% faster
- Compatible with the PC Emulator
- Increases the speed of the desktop
- Must be fitted by component level engineer
- Price includes installation by Beebug
- Replaces the standard ARM2 processor

COMPUTERWARE HARD DRIVES THE QUALITY CHOICE HIGH QUALITY DRIVES AT DISCOUNT PRICES

The Computerware internal hard disc upgrades feature superior quality drives that will provide reliable, yet high performance operation. Fitting instructions are provided, however we would be happy to install the drives for you free of charge. Please contact our Engineering Department to arrange a day for fitting before bringing your machine in. The 50 Mb drive is the same model Acorn use in the 440/1. Only quality mechanisms from respected manufacturers such as Rodime, NEC and Seagate are used. All drives autopark and feature access times of less than 29 ms. Drives are guaranteed for a full year.

HARD DISCS FOR THE 300 SERIES

0292G 20 Mb + I'face (300's) *	414.06	379.48
0293G 40 Mb + I'face (300's) *	644.58	575.28

* A podule backplane is required for these items.

HARD DISCS FOR THE 400/1 SERIES

0291G 20 Mb (400 series)	217.41	206.98
0290G 40 Mb (400 series)	414.06	376.91

0295G 75 Mb (400 series)	1033.85	984.61

DELTACAT JOYSTICK

High quality joystick for the Archimedes (ideal for use with Interdictor).

Members Price £28.45 Stock Code 0723C

BEEBUG UPGRADE PACKAGES FOR 410/1

We have put together a special package for 400/1 owners that allows easy upgrading to specifications comparable with the 420/1 and 440/1. Many users will not require a full 4 Mb of memory and therefore these upgrades allow a powerful system to be created that matches the requirements for the majority of Arch users at a lower cost than the full 440/1 price.

All packages include:

- RAM conforming to Acorn's specification
- High quality Computerware Hard drives
- Drive manufacturers include NEC, Rodime
- All items fitted free

NEW LOW PRICES ON 400/1 SERIES RAM UPGRADES

We are now able to supply RAM upgrades for the 400/1 series of computers at a new low price.

A3000 - The New BBC Computer

The Acorn A3000 is the BBC Computer for the 1990s, bringing the power of Acorn's RISC technology into schools and the home. Existing users of Acorn equipment can step forward into new technology whilst retaining the reassuring character and wide adaptability of the old 'Beeb'. The A3000 even runs many programs written for the BBC B and Master.

RISC OS, Acorn's highly acclaimed multi-tasking windowing system is supplied as standard. A massive 1Mb of RAM can be upgraded to 2Mb. A 3.5" floppy drive is incorporated into the casing of the computer with many expansion possibilities including the use of a hard disc drive. The optional PC emulator allows the use of industry standard software.

NOW SUPPLIED WITH SUPERIOR COLOUR MONITOR - All A3000 colour systems supplied by BEEBUG are now supplied with the superior Philips CM8833 colour monitor, featuring stereo sound and a video input. A special stereo monitor sound lead is also supplied. The standard Acorn monitor is still available if preferred.

Beebug offer you a choice of

Either: 0% Finance and free On-Site Maintenance.

Or: On-Site Maintenance, Pacmania, Printer Lead, 10 x 3.5" Discs and a lockable disc box.

0288C A3000 3Mb RAM Upgrade	686.55	652.20
0723C Voltmace Delta Cats	29.95	28.45

We are able to supply a range of hard drives for use with the A3000. Connection of the drives is via a SCSI card. A total of eight SCSI devices may be connected. A suitable Tape Streamer should be available shortly.

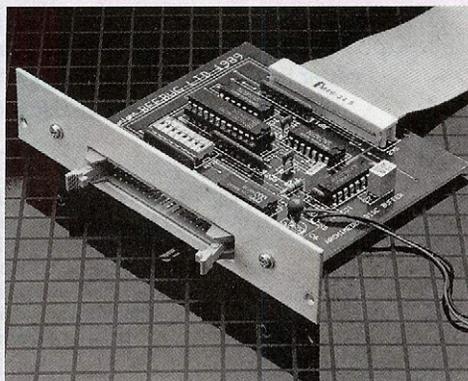

Archimedes 5.25" Disc Buffer MKII

Connect up to four drives to your Archimedes

This interface allows up to four drives to be connected to an Archimedes system. Almost any 5.25" disc drive can be connected, provided the drive has its own power supply. As well as buffering the signals from the computer, the interface can re-map external drives making it unnecessary to change links in the drives. In addition the interface can double-step an external drive, so that 40 track discs may be read on an 80 track drive. This is particularly useful for reading/writing 40 track IBM discs under the PC Emulator, as well as Acorn ADFS/DFS discs.

The interface is mounted neatly in the back of the computer and requires no soldering.

Members Price £33.25 Stock Codes: 0795C (300 Series) 0784D (400 Series)

SERIAL LINK KIT

This kit provided an easy method of transferring files between the BBC Micro or Master 128 and the Archimedes, in either direction with the minimum of fuss.

For ease of use, all operations are mouse driven from the WIMP environment, with the BBC acting as a remote terminal. Works with both DFS and ADFS. The kit contains software on disc, three metre serial cable and user instructions,.

Members Price £17.25 Stock Code 0796C

DFS Reader

The ideal companion for the Archimedes Disc Buffer

DFS Reader allows the Archimedes system to read DFS format discs. It transfers files easily and quickly from 5.25" DFS discs. Compatible with the Acorn DFS, Watford DFS and DDFS. Commands are available to catalogue the DFS disc, copy individual files or groups of files, and backup the entire disc.

MASTER ROM

The Beebug Master ROM is a powerful 32K ROM developed to enhance the ADFS, sideways RAM, and real-time features of the Master 128 and Master Compact.

Features include: A comprehensive Disc Front End, Multi-Option Panel, Diary with Calendar and Alarm. Plus a Printer Buffer using sideways RAM, a RAM Disc, and a host of invaluable disc commands.

COMMAND ROM

The Command Driven Communications ROM

Unlike much communications software, this 16K ROM is command driven and has a very powerful extended command set. In addition, for ease of use, all major features are available at the touch of a function key. Because the ROM may be command driven it is exceptionally easy to link commands together in Basic to meet your own individual needs.

Text Terminal

Use this terminal to access Telecom Gold and thousands of bulletin boards worldwide. XMODEM file transfer allows you to send files to a friend for the cost of a phone call.

Telephone Directory

Set up the name, number and modem configuration of your favourite bulletin boards for easy recall at a later date. No need to remember telephone numbers any more, just type:

***CALL PRESTEL**

for example, and everything will be done automatically for you - even sign-on strings and passwords are entered.

Disc Menu

Typing *MENU takes you straight to a full feature disc menu and front panel. This gives a readout of current status and displays all the items in the current directory. Just select the file or directory of your choice to be loaded and run. The menu also allows files to be marked for subsequent copying, renaming or deleting

Other Features

- **Control Panel** - displays all the Master's preset options as well as all available ROMs. The cursor keys are used to move around the panel, and to adjust the state of any items. Current status settings may be saved away to disc for subsequent reloading at any time.
- **Printer Buffer** - the Master ROM boasts a 16K-64K full feature printer buffer. This uses sideways RAM in selectable banks, allowing you to print long documents whilst using the computer for another task.
- **Diary & Alarm** - the Master ROM allows you to keep a disc-based diary and alarm with reminders for any date in the year.
- **RAM Disc** - a simple RAM disc of up to 64K in length. Commands are provided to save programs and memory to the RAM disc.

Disc Commands

The Master ROM boasts a wealth of new disc commands to help the user exploit the power of the ADFS with its nested directory structure. Commands include: *BACKUP *WIPE *USED *CATALL *FIND *FORMAT *BACKUP *MERGE *DIRCOPY *FCOPY *GOTO

Viewdata Terminal

A full feature Viewdata Terminal giving access to thousands of pages in Prestel and other Viewdata services.

Viewdata Editor

A complete teletext editor, with a full range of editing commands, on-screen help, and a pixel editor.

Modem Compatibility

The standard version of Command is suitable for the Magic Modem and similar models (Demon, Apollo etc). The Hayes version is suitable for Hayes and other intelligent modems.

ROM PODULE

The ROM expansion card from Acorn provides a ROM filing system for use on the Archimedes range. It has five vacant sockets into which 16Kb, 32Kb, 64Kb ROMs/EPROMs or 128Kb JEDEC EPROMs may be plugged. Each ROM can contain several files of varying size. There are two additional sockets provided for static RAM. Optional components may be added to provide battery backup for these RAM sockets.

SCSI EXPANSION CARD

SCSI (Pronounced scuzzy) is an industry standard interface for the connection of external equipment such as hard discs, scanners and tape streamers. We are currently evaluating a number of SCSI devices to connect up to the Lingenuity SCSI expansion card. Please contact us for further information.

Members price £218.99 Stock Code 0863D

MIDI PODULE

MIDI is the acronym for Musical Instrument Digital Interface. By installing the MIDI interface in your Archimedes and connecting a music keyboard, you can use the computer as a musical instrument. The sound can be made by the speaker on the computer, or you can plug in headphones, or your hi-fi system.

The Archimedes can also be used to extend the capabilities of the instrument you have, provided they have MIDI installed. By using application programs a full MIDI studio facility becomes possible.

Members price £74.75 Stock code 0273D

I/O PODULE

The I/O Podule allows various existing 6502 BBC peripherals to be connected to the Archimedes system. It is not suitable for the Teletext Adapter, Acorn 1 MHz bus, Winchester Drive or IEEE 488 Interface due to software limitations. The interfaces provided are the 1 MHz bus, the User Port, and the Analogue to Digital Converter. There is also an optional MIDI interface.

The Beebug Scavenger hand-held image scanner adds life to Desktop Publishing, Word Processing, Drawing and Painting, and many other activities. Just some of the possible uses are:

- Incorporate photographs and drawings into text documents.
- Scan pictures and use them as templates for line drawings.
- Create artwork for exciting title screens.
- Scan photos and text to make a graphical database.

Scavenger consists of a professional quality scanner manufactured by Mitsubishi, a half-width interface podule, and a comprehensive user guide covering installation, use, hints and tips, technical information and routine maintenance.

We recognise that the needs of users will vary, and therefore Scavenger is available with two different scanners. For most users the half-width scanner, capable of reading an image upto 105mm wide, will be suitable, while for those with greater needs, a full A4 width device that can scan a 216mm wide image is available. If you find your requirements grow, you can upgrade to Scavenger A4. To obtain the greatest scanning precision, a sheet feeder can be added to

Scavenger A4. This is fully automatic and can scan an entire A4 page under software control in just 15 seconds.

The WIMP-based software to operate the Beebug Scavenger is incorporated in a ROM on the interface podule, eliminating the need to load lengthy programs from disc. Scavenger is operated from the Desktop, and you can choose whether you want the software to install itself automatically on the iconbar (provided the scanner is connected), or whether you wish to start it manually through a star command. Just some of the features offered by the software are:

- Variable image size, with the maximum width being limited by the scanner, and the depth limited only by the available memory.
- Real-time display into a window as the image is scanned.
- Save all, or part of, the scanned image as a sprite or as a bit-image Draw file.
- Conversion of dithered monochrome image to four or sixteen grey levels. Ideal for enhancing photographs.
- Edge detection to create outline drawings from scanned images.
- Full control of optional sheet feeder to allow automatic scanning.

MASTERFILE

BEST SELLING GENERAL PURPOSE DATABASE FOR THE BBC MICRO, MASTER 128 AND ARCHIMEDES

Masterfile is a powerful general purpose database that is easy to use, and suitable for the home, business or school. It is supplied ready to run, and no programming skills are required. Masterfile enables large amounts of information to be stored, processed, searched, amended, etc.

Features include...

- Menu driven for ease-of-use
- Fast 'tag' sorting
- Flexible print layouts
- Global calculations
- File size is limited only by disc capacity
- File append option
- Search for a particular match
- Sorting on any item or items
- Direct access to any record
- Form designer
- Label printing facility
- Record insertion
- CSV output

INTERDICTOR FIGHTER PILOT CONTROL SYSTEM

One of the most eagerly awaited releases for the Archimedes this year. Interdictor is the new, highly addictive flight simulation package from Clares.

Developed by a team of workers who have until recently worked for British Aerospace, you can expect a very accurate, fast and exciting simulation.

The enemy aircraft and explosions do not use sprites but are instead plotted onto the screen, thereby creating a more accurate display of the attackers.

The package is designed to work with the standard mouse although a joystick option allows the use of the Voltmace Delta-cat.

RISC OS and at least 1mByte of RAM is required.

Members Price £34.95 Stock Code 1090B

E-TYPE

RISC Racing Simulator

Take control of £70,000 worth of 'E-TYPE' and head off for the drive of a lifetime. Hear the digitised roar of the 5.3 litre 12 cylinder engine and experience amazing graphics as you speed along at over 150 mph.

ISO C

is an amazing new implementation of the professional programming language C.

It consists of a relocatable module containing a powerful compiler and linker, and a WIMP based program development environment including editor that runs from the RISC OS Desktop.

Simply enter your program in the editor, click on the 'run' option, and let ISO C do the rest! ISO C conforms to the full ISO standard and is supplied with a very comprehensive library of ANSI and RISC OS functions.

Available soon. Please phone for info.

Members price: £79.00 Stock code: 0107D

ANSI C RELEASE 3

The C programming language is widely used for graphical, numerical, text processing and database software, and the design of operating systems and compilers. It is the most versatile modern computer language for professional applications, and as a result is also increasingly in demand.

NEW IMPROVED VERSION

LISP

Lisp was originally developed to provide support for an on-going research project in computer algebra. It is intended for running experimental programs, and so makes a policy of checking for exceptional cases and provides clear and concise diagnostics.

THE INDISPENSIBLE PACKAGE FOR ALL HARD DISC USERS

Hard Disc Companion

This package contains three comprehensive, easy to use utilities to backup your hard disc, create file archives, and search for files.

All three utilities were written specifically for the RISC OS desktop environment, and are multi-tasking.

Hard Disc Backup

The backup facility allows you to save the contents of your hard disc onto floppy discs. It is comprehensive, easy to use and very reliable. Two types of backup are possible; Full and Incremental. Full saves every file on the hard disc to floppy. Incremental saves only those files added or changed since the last backup. Certain files are automatically

compressed to reduce the number of floppies needed for the backup. Restore is equally comprehensive with options for full, partial or file by file restore. Individual files can be restored by dragging from the backup disc to the required destination. An automatic reminder facility can be set up to remind you at regular intervals to perform a backup.

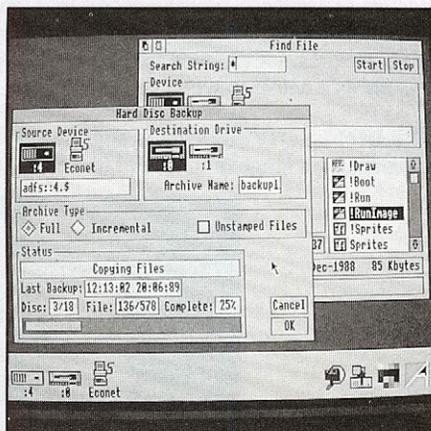

Members price:

£35.00

Stock code: 0106C

Econet Compatibility

Although designed for hard disc users, this package is ideal for use with Econet. Site licences are available - please phone for details.

Spark - File Archiver

Spark is an archiving program used to create and maintain file archives. It is entirely WIMP based, with the contents of an archive displayed in a similar way to an ADFS directory. Files may be dragged directly from a directory into the archive, or vice versa. An important feature of **Spark** is that it automatically compresses the files being archived. **Spark** is very easy to use, and has many uses. For example, you could put 2MB (or more!) of sprites onto an 800K floppy disc. Then, to load a sprite into ArcPaint, simply drag it from the archive - it will be decompressed automatically. **Spark** has many powerful features, and is compatible with the public domain archiver, **Arc**.

Find File

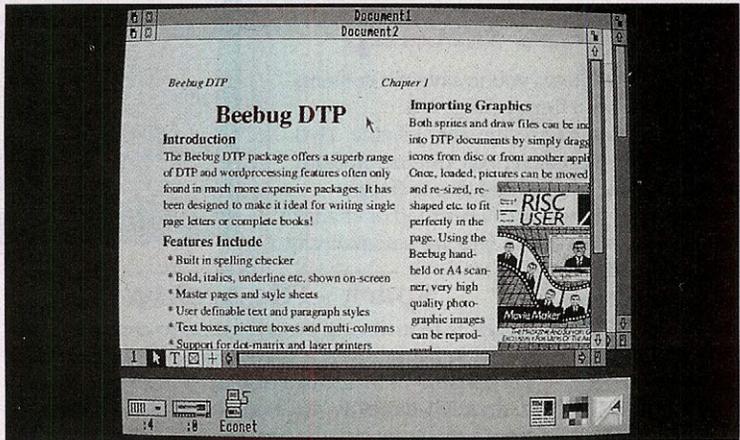

Find File is a fast, easy-to-use utility for locating files on hard disc, floppy disc and Econet. **Find File** runs from the multi-tasking Desktop environment, so it can be left to search for a file while you do other things. As well as finding individual files, **Find File** can locate files that match a wildcarded search string, or that have a specified filetype. Once a file has been located, **Find File** can give full information about a file including its filetype, length, and pathname. In addition, you can open a directory viewer on the file so that it can be easily loaded, executed, deleted etc.

BEEBUG DESKTOP PUBLISHER

The Perfect Solution

Beebug DTP is a brand new package written specially for the Archimedes. It has unrivalled DTP features which allow the creation of professional looking pages for leaflets, newsletters, adverts, posters or use it as a wordprocessor for typing letters and documents. The package is easy to operate, even for first time users. Type in the text, specify the font, style and size, add headlines, import and scale pictures, move items to their final positions; the page you are creating is shown on the screen exactly as it will look when printed.

The Beebug DTP package is supplied with a comprehensive user guide, a selection of example documents, a range of fonts and frame designs, and a disc full of high quality 'clipart'.

- Full WYSIWYG display
- Bold, italics, underline, reverse** etc.
- Very fast built-in spelling checker
- User definable text styles
- Style sheets
- Vast range of font sizes
- Multi-column text
- Auto text flow from page to page
- Import of sprites and draw files
- Repositioning and rescaling of pictures
- Supports coloured text, boxes and frames
- Copy, cut, paste etc. using clipboard
- Linkable text boxes
- Excellent box framing facilities
- Kerning, horizontal scaling, and leading
- Variable page size and orientation
- Multi-tasking and multi-documents
- Variable scaling for viewing and editing
- Easy to use headers and footers
- Powerful search and replace
- Support for Acorn's printer drivers
- Variable size, style and coloured lines

Available late '89 / early '90 Beebug DTP code 0108D **Members Price £99.00**

MASTER ROM

The Beebug Master ROM is a powerful 32K ROM developed to enhance the ADFS, sideways RAM, and real-time features of the Master 128 and Master Compact.

Features

Control Panel - displays all the Master's preset options as well as all available ROMs. The cursor keys are used to move around the panel, and to adjust the state of any items. Current status settings may be saved away to disc for subsequent reloading at any time.

Printer Buffer - the Master ROM boasts a 16K-64K full feature printer buffer. This uses sideways RAM in selectable banks, allowing you to print long documents whilst using the computer for another task.

Diary & Alarm - the Master ROM allows you to keep a disc-based diary and alarm with reminders for any date in the year.

RAM Disc - a simple RAM disc of up to 64K in length. Commands are provided to save programs and memory to the RAM disc.

Members price £29.25 Stock code 0087C

MASTER 128 SYSTEM ROM

The New Alternative System ROM from Acorn

New features include:

- Extra Commands
- Extensions to existing commands
- A relocater for use with the 6502 second processor
- Increased speed in some areas
- Extended 8-bit character handling for foreign use etc

This alternative ROM is highly compatible with existing applications software, although not 100% compatible. For this reason the ROM is only available as an upgrade and will not be supplied as standard.

SPECIAL CHRISTMAS OFFERS

The Master 128 is the foundation stone of the Master Series. It has a powerful wordprocessor (View) and spreadsheet (Viewsheets) as well as version 4.0 of BBC BASIC, widely regarded as the best BASIC in the world. Two disc filing systems, the DFS and ADFS, are included as standard to allow the control of a disc drive. The DFS is very simple to use while the ADFS offers a very powerful system suited to business and serious use. A TV output is standard although we would recommend the use of a proper monitor. An enormous range of software exists for the Master 128, which is of course, the backbone of educational computing in the UK.

ON-SITE MAINTENANCE AND INTERWORD

On-site Maintenance ensures that in the event of your Master 128 developing a fault an engineer will call at your home or place of work to repair the machine. If the machine is not repairable the same day a loan machine will be left (subject to availability). The contract is for one year and the engineer will be with you within 24 hours (during normal working hours).

Interword is the very successful Wordprocessor ROM from Computer Concepts. Worth over £50.

COLOUR MONITOR FOR ONLY £180

For a limited period only, members who purchase a Master 128 have the opportunity to purchase the Acorn Colour Monitor at £180. The two must be ordered at the same time. This represents a saving of £70.

The monitor may not be added to 0% finance.

FREE

or

0% FINANCE

0% Finance is arranged through Beebug and Mercantile Credit. An initial 10% deposit is required with the remainder payable in nine monthly payments.

Colour Monitor and Cumana CSX400 Disc Drive for only £290.

Cumana CSX400 is a high quality 40/80 track switchable disc drive offering good performance with Cumana's excellent record for quality products.

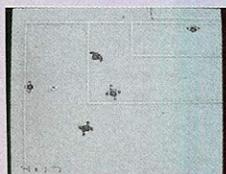

Acorn RGB monitor is the standard monitor Acorn supply with the Archimedes and Master Compact and offers good medium resolution colour performance. A suitable lead for the Master 128 is included in the price.

This offer may not be added to 0% finance

ARCADE SOCCER

Using an overhead view to make the game play as exciting as possible it features everything you could want in a football arcade game. Arcade Soccer not only gives you total action it also puts you in total control.

PREDATOR

You've heard about PREDATOR, the Schwarzenegger film – now you can play the leading role. Take a crack commando unit into the South American jungle to rescue a bunch of trapped diplomats. Should be easy enough... so it would be, if it weren't for the mysterious alien who keeps on taking out your men.

All the thrills and action have been captured by brilliant programming, using features such as parallax scrolling and dual-screen updating.

VIEWSHEET

A full 16K ROM based spreadsheet with 255 columns and 255 rows. 6502 second processor compatible.

VIEWINDEX

Automatically creates an index, sorting it into alphabetical order and noting section references.

VIEWSTORE

A powerful 16K ROM based database manager. Each record can be up to 25K long depending on screen mode, or up to 30K if used on a 6502 second processor.

VIEWSPELL

A ROM based automatic spelling checker with master dictionary containing 75,000 words.

VIEWPLOT

A disc based program which allows you to create graphs using Viewstore and Viewsheet data.

Inter-Series

All Inter packages are fully compatible with each other and allow in-memory transfer of their data.

InterWord

The highly acclaimed WYSIWYG word processor, the most advanced available for BBC B and Master series.

InterSheet

A fully featured spreadsheet featuring a 106 characters per line screen display.

InterChart

The graph plotting package.

InterBase

A sophisticated database package with its own unique programming language.

Mega 3

This is a special ROM which houses InterWord, InterSheet and InterChart and only occupies a single ROM socket.

OVERVIEW

A must for all Master 128 or Compact users. This package contains all the remaining parts of the View family to complement those already fitted within the respective computers.

The C Programming Language

Beebug C for the BBC micro and Master series

Beebug C is a full implementation of the exciting programming language C, which is used by many professional programmers. Although normally only available on much more powerful computers, Beebug C is a full implementation of the Kernighan and Ritchie standard for the BBC micro and Master series computers. A comprehensive set of library functions are supplied on disc, conforming to the proposed ISO standard.

Features include:

- ◆ Runs on a standard 32K BBC model B, B+, Master 128 and Master Compact.
- ◆ 40/80 track DFS and ADFS compatible, also 3.5" Master Compact version .
- ◆ Support for Acorn operating system (vdu, osbyte, mode etc.)
- ◆ Powerful command line interpreter with over 20 commands & qualifiers
- ◆ Expandable run-time library on disc containing nearly 100 functions & macros
- ◆ Full macro-handling facilities
- ◆ Debugging facilities and helpful error messages

"...the Beebug implementation is superior in so many respects..."
"The Beebug C system is far superior to that provided by Acorn"
"...the Beebug version has to be the best buy"

A&B COMPUTING FEB 1988

"...Beebug C is about five times faster at compilation and linking than the Acornsoft version..."
MICRO USER NOV 1987

Members price: **£44.25**

Stock code: 0074C 40T disc
Stock code: 0075C 80T disc

Beebug C is supplied on two 16K ROMs and a library disc (specify 40T or 80T)

To write C programs you will need a text editor or word processor such as View, Wordwise, InterWord etc.

Beebug C is also available as a 3.5" ADFS disc only version for the Master Compact.
Members price: **£44.25** Stock code: 0076C

Beebug C Stand Alone Generator

An add-on to Beebug C which produces stand-alone code which will run on any BBC or Master computer (memory permitting). It is supplied on a dual-format disc which also contains a number of trig functions, including:

SIN COS TAN LOG LN EXP

Members Price: £14.25

Stock code 0077B 5.25" dual format disc
Stock code 0078B 3.5" disc for Master Compact

The C Programming Language 2nd Edition

By Kernighan and Ritchie
This excellent book is recommended for anyone wishing to learn C. It covers the new ISO extensions to C as well as the original standard.

Members Price: £22.75

Stock code 1291C

Complete C

Complete C contains Beebug C (80T), Stand Alone Generator and the book *The C Programming Language* (2nd Edition).

Members price: £75 Stock code: 0079D

LOGO

Designed to introduce students to elementary programming techniques using a programmed screen "turtle" to create graphics displays. This is a full implementation of Logo.

Members Price £58.90

Stock code 1006D

ISO Pascal

This programming language compiles to a compact intermediate code which is then interpreted and gives a performance superior to BASIC without the need for the complexities of machine code.

Members Price £58.90

Stock code 1007D

BCPL

An easy-to-learn, modern and highly structured language which provides the programmer with direct access to machine addresses and operators. Ideal for low-level and system programming.

Members Price £50.35 Stock code 1004D

VIEW 2.1

The 16K ROM based word processor featuring 40 or 80 column displays and up to 25K of text space.

HI-VIEW

A special version for use with the 6502 second processor.

PRINTER DRIVER GENERATOR

For use with View to customise the printer driver for your specific printer.

VIEW 3.0

An advanced version of View which utilises shadow memory of a B Plus, and gives 47K of text space if a 6502 second processor is fitted. It offers extra features and includes the Printer Driver Generator program on disc and tape.

CUMANA CS200

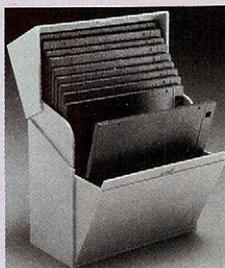

The CS200 is a double-sided 40 track disc drive with its own power supply. It replaces, at a similar cost, the original single-sided CS100 but has the advantage of being double-sided allowing twice as much storage. The CS200 is also available without a power supply (CSX200) and is powered from the BBC machine's own power supply instead.

CS200 – £122.55 Stock code 0610F**CSX200 – £103.55** Stock code 0600F**CUMANA CD800S**

The CD800S is a dual unit with two double-sided 80 track disc drives side-by-side and a built-in power supply. Each drive has a switch mounted on the front panel which allows access to 40 track discs. Having two drives enables you to copy from one disc to another (even from 40 to 80 track) and certainly takes the strain out of making backups. The best set-up for serious users.

CD800S – £265.05 Stock code 0604G**CUMANA CS400S**

The CS400S is a double-sided 80 track disc drive with its own power supply. It has a switch mounted on the front panel which allows the drive to also access 40 track discs giving you the best of both worlds. The CS400S is also available without a power supply (CSX400S) and is powered from the BBC machine's own power supply instead.

ECONET SYSTEMS

BEEBUG is an approved Acorn Econet Centre and can supply complete systems tailored to your own individual requirements and budget. Networking your school or business can be made an affordable proposition with the right advice. We are able to offer an on-site advisory service that will provide you with accurate information on the practicalities of installing a network. You are not under any pressure to buy the equipment and we will not sell a system where it is not required or is unsuitable. If you decide to buy a system from us the fee for the advisory service is refundable.

BEEBUG only use qualified and experienced staff so you can rest assured that your network is going to be installed reliably with the minimum of fuss. Networking does not have to mean lots of untidy wiring; all our networks are neatly installed and if required we can hide all cabling from sight. If you wish to install a network yourself we are able to offer you free telephone advice on the equipment that will be required.

ACORN'S ECONET SYSTEM

- The ECONomy NETWORK
- Reduces the cost of peripherals
- Easy to install and maintain
- Many users throughout the world
- Suitable for education and business
- Powerful utility software provided
- Suitable for BBC and Archimedes
- Over 250 stations per network
- Multiple printers supported
- Separate networks can be linked

THE NEW STACKING FILESTORE FROM ACORN

- The reliable 'heart' to your system
- Up to 240 Mb of storage per E01S
- Built in printer server
- Two fast 3.5" disc drives in E01S
- 40 Mb or 60 Mb hard disc available
- Powerful utility software included

HEARSAY Archimedes Communications Package

Hearsay is a comprehensive communications package written specifically for the Archimedes. It is mouse-driven and takes full advantage of the WIMP system making it extremely easy to use.

Hearsay provides extensive emulations of all the terminals you should ever need, including: VT220, VT102, Viewdata (Prestel), Tektronix and TTNS.

It is ideal for use with Prestel, Telecom Gold and bulletin boards, and no technical knowledge is necessary. However, experienced users will find Hearsay packed with exciting features making it an indispensable tool.

Members Price **£51.75**

Stock Code 0101C
Econet version and site licences available.
Please call for details.

Hearsay will work with most modems including: Hayes (Linnet, Amstrad SM2400 etc.), Tandata DTI, Dacom DTI and Magic Modem.

"...thoughtfully presented with a number of excellent features..."
PCW April 1989
"...extremely capable and thoroughly recommended."
ACORN USER Dec 1988
"Quite simply, Hearsay is visually stunning and extremely effective."
MICRONET Aug 1988
"...it could become the standard comms package for education."
IT Education/Network User Nov 1988

Technical Information

Terminal Emulations: Full feature VT220, VT102, VT52, ANSI, Viewdata, Tektronix, TTNS and Teletype.

File Transfer: Configurable XMODEM, YMODEM, YMODEM Batch, SEALink, Kermit and ASCII.

Telephone Directory: Up to 100 entries, each containing: name, number, status file, terminal type and sign-on string.

Communications: Call, Redial, Connect, Disconnect, Talk To Modem, Reconnect, Short Break and Long Break

Hearsay requires 1MB of RAM and is compatible with Arthur 1.2 and RISC OS.

The Ideal Companion to Wordwise, View and InterWord

Printwise

Printwise is a low-cost publishing aid for the **BBC micro and Master series** computers. It allows you to create professional looking magazines, leaflets and posters. The possibilities are endless. It can also be used to produce 'near letter quality' printout for correspondence. Simply take your text file created using almost any wordprocessor, insert the special embedded commands for the font styles you require, and let Printwise do the rest.

Features

- A range of authentic fonts covering type sizes from approx 4pt to 40pt
- All fonts can be used in the same document, or even on the same line
 - Italics, bold, condensed, reversed-out typestyles available
 - Proportional spacing, right justification, full indentation
- Powerful font designer for creating your own fancy fonts, or for editing the supplied fonts
 - Suitable for all Epson compatible printers, and the Shinwa CP80
 - Easy to use - no programming skills are necessary
- May be used with text files created on Wordwise, View, InterWord, Mini Office and almost any text editor.

RISC OS PROGRAMMERS REFERENCE MANUAL

The RISC OS Programmers Reference Manual (PRM), produced by Acorn, is the ideal reference book for all programmers and serious users of the A3000 and Archimedes. The PRM comprises four volumes presented in a similar style to the Welcome and User Guides. The feedback from users who have already purchased the PRM is very encouraging.

Price £79.00 Stock Code 1245G

Beebug Retail . . . Beebug Retail

The Archimedes running the PC Emulator has, for the first time, given users of Acorn Computers genuine access to the amazing wealth of PC software. To complement our range of computers and peripherals Beebug are now offering a selected range of PC Compatibles and associated hardware/software.

Please call to discuss your requirements.

AMSTRAD

Amstrad were one of the first companies successfully to market low price clones of the IBM PC whilst at the same time improving on the original specification of the machine. The new Amstrad PC 2000 range represents excellent value for money and gives access to the wealth of established MS DOS software now available. Beebug are now an appointed Amstrad Advanced Systems Centre and would be pleased to discuss your requirements and offer advice.

All models are supplied ready to use, with keyboard, mouse, MS-DOS and the popular Windows Operating System.

MONITORS

There is a choice of 4 monitors, all with tilt and swivel base and antiglare screens:

- 12" Monochrome (64 Grey Shades)
- 14" Medium Resolution Colour (Dot Pitch 0.42)
- 12" VGA High Resolution Colour (Dot pitch 0.28)
- 14" VGA High Resolution Colour (Dot Pitch 0.29)

The VGA monitors provide a stunning display allowing up to 256 colours from the palette of 262,144 to be displayed at any one time.

DISC DRIVES

All machines are supplied with a 3.5" internal disc drive, with options for an additional internal 2nd floppy or hard disc drive. It is important that you decide which option you require at purchase, as these 2nd drives are built into the computer when supplied. There is also an inbuilt interface for an external drive (5.25" or 3.5") or tape streamer.

AMSTRAD 2086

This is the entry level machine in the PC2000 range and is ideal for most home and business users requiring a PC. Running at 8MHz with 640K RAM it will speedily run all PC software, and with a VGA monitor, provide stunning graphics.

- 720K 3.5" Disc Drive
- 8 MHz 8086 Processor
- Supplied with DOS 3.3
- 640K Parity Checked RAM
- Optional 30Mb hard drive
- Optional 2nd Floppy Drive
- VGA/EGA/CGA Compatible
- 3 x 8 Bit-Expansion Slots Free
- Adaptor For External Drive/Streamer
- 8087 Maths Co-Processor Socket

Beebug Retail . . .Beebug Retail

AMSTRAD PC 2286

Running at 12MHz the 2286 is a very swift machine indeed, and if used as a stand-alone system provides an excellent work station for anyone demanding above average performance. It is supplied with version 4.0 of DOS and the 286 version of MS Windows, allowing several applications to be accessed simultaneously. The 2286 can be used as a fileserver for Novell Netware.

- 1.4 Mb 3.5" Disc Drive
- 12 MHz 80286 Processor
- Supplied With MS DOS v4.0
- Windows V286
- 1Mb RAM Expandable To 4Mb
- Choice of VGA Monitors
- Adaptor For External Drive/Streamer
- 40Mb Hard Disc Option
- 5 x 16 Bit Expansion Slots
- 80287 Maths Co-Processor Socket

FREE ON-SITE MAINTENANCE FOR ALL 2286 & 2386 MACHINES

As a member of Beebug or RISC User, we will supply 1 year's on-site maintenance free with all 2286 and 2386 systems. This ensures 8 hour call out if you have problems and a loan machine if necessary.

Beebug Retail . . . Beebug Retail

For users requiring a dedicated wordprocessor the Amstrad PCW is a good choice. Impressive facilities at a very affordable price have made the PCW series Britain's best selling wordprocessor range. A much better investment than a typewriter.

PCW 8256

A fully integrated wordprocessing system with keyboard, screen, 256K of internal RAM, 180K 3" disc drive, software and printer. Established over the last two years as the market leader, the PCW8256 continues to offer unbeatable value for money.

Price £401.35 Product Code 3450G

PCW 8512

Offering double the internal memory of the PCW8256 plus an additional 720K disc drive, which both avoids the need for frequent disc swapping, and gives you greatly increased data storage capacity at only £115 more.

Price £516.35 Product Code 3451G

PCW 9512

SPECIAL OFFER FREE SHEETFEEDER

The PCW9512 is the top of the range Amstrad wordprocessing system. It features an enhanced keyboard and an upgraded version of the Locoscript software, with built-in 78,000 word spelling checker. The software also includes Locomail, a powerful mailmerge program for combining mailing lists with letters, to give personalised letters from a single document.

The daisy wheel printer included with the PCW9512 is a wide carriage (15" platen) unit, now supplied with a free automatic sheet feeder in addition to the tractor feed. This enables you to print on continuous stationery, as well as individual sheets.

The system also includes a paper white high resolution 90 x 32 character mono monitor and built-in 720K disc drive.

Price £573.85 Product Code 3452G

COMMODORE PCs

Commodore are known in the UK for their competitively priced range of home computers but in Europe they have quickly become the 2nd largest supplier of PCs. Major users of Commodore PCs include BMW, Kodak, Heineken (Netherlands) and Express Dairies. Commodore are now launching their new Series III systems in the UK.

The complete range of Commodore PCs are built in Germany to an exacting specification to ensure trouble-free operation. For extra quality control, the machines are rechecked on their arrival in the UK. The quality of the construction and the circuit board will be good news for those who have looked at the competition. Commodore's total confidence in their range is backed-up by 12 months on-site maintenance with next day call out.

Commodore's pricing is very competitive by any standards, yet they have managed to produce high quality machines with truly exciting performance.

All models are supplied with keyboard, MS-DOS, GW-Basic and full documentation.

PC 10 / PC 20 Series III

Commodore

SPECIAL OFFER FROM COMMODORE

PC10 Dual Drive, Printer, Framework,
On-Site Maintenance - Save up to £441*

Everything is here for the small business. The PC 10 (XT compatible), monitor, mouse and printer plus Ashton's Tate Framework II. This award winning software features word processing, spreadsheet, database and graphics.

The hardware is covered by a year's on-site next day maintenance and the software by a 3 month contract to use Ashton-Tate's hotline.

Also included are a Microsoft compatible mouse and the Commodore MPS 1230 9-pin dot matrix printer.

* RRP MPS 1230 Printer £229.99

RRP Framework £632.50

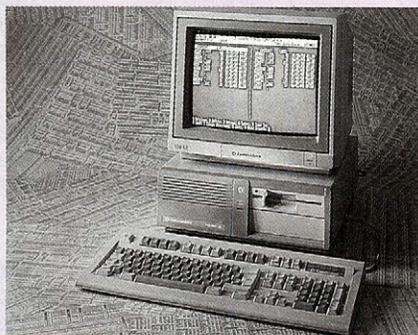

PC10 / PC20

The Commodore PC 10/PC 20 Turbos:
Powerful XT compatible industry standard PCs.

The 8088 processor can run at three clock speeds: 4.77, 7.16, 9.54 MHz.

Both versions have 640Kb of RAM, with the hard disc controllers integrated into the system board, freeing valuable expansion slots. Included are comprehensive colour graphics, standard mouse, clock/calendar and hard disc interfaces allowing flexibility to expand now and in the future.

- 8088 processor
- Three clock speeds (switchable)
- 9.54MHz Turbo mode
- 640k RAM (expandable)
- 3 free expansion slots
- MS-DOS v3.21
- Small footprint

PC 10 BUNDLED PACKAGES

Dual 5.25" Disc Drive, Framework II, Mouse & Printer

PC 30 series III

PC 30

The Commodore PC 30 III is a low cost AT-compatible having all the versatility and performance expected from a 12MHz 80286 processor with many integral features including:

- 80286 Processor
- 6, 8, 12MHz Clock Speeds(Switchable)
- MS-DOS version 3.3
- Mouse (Microsoft Compatible)
- EGA, CGA & Hercules Graphics
- 20Mb Hard Disc (larger sizes available)
- Supplied with Windows 286
- 3.5" 1.44Mb Floppy Disc Drive
- On-board Controllers for Disc Drives
- 640k RAM (Expandable to 15Mb)
- 3 Free Expansion Slots
- Small Footprint
- Security Key Lock
- Space for second internal drive
- On-site warranty for one year

PC40

The Commodore PC 40 series III is the top of the range machine from Commodore, offering more RAM and larger storage capacity than the PC 30 along with a greater potential for expansion.

Programs run on the PC40 are able to operate at very considerable speeds, aided by the short access time of the Commodore Hard Disc and by exploiting the potential of the 16/32 bit processor.

- 80286 Processor
- Three Clock Speeds (6, 8 or 12 MHz)
- 40Mb High Speed Hard Disc
- 1Mb RAM (640k Base, 384k Extend.)
- RAM Expandable to 15Mb
- 4 Free Expansion Slots
- MS-DOS v3.3 and Windows 286
- VGA Graphics
- 5.25" (1.2Mb) disc drive
- On-site warranty for one year
