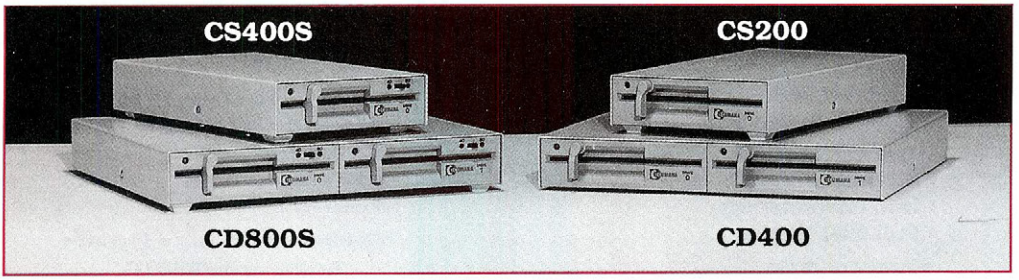
Disc Drive Facts

NEW CUMANA DISC DRIVES



CUMANA CS400S

The CS400S is a double-sided 80 track disc drive with its own power supply. It has a switch mounted on the front panel which allows the drive to also access 40 track discs giving you the best of both worlds. The CS400S is also available without a power supply (CSX400S) and is powered from the BBC machine's own power supply instead.

Members Price of CS400S **£141.55**

Stock code 0603F

Members Price of CSX400S **£122.55**

Stock code 0602F

CUMANA CS200

The CS200 is a double-sided 40 track disc drive with its own power supply. It replaces, at a similar cost, the original single-sided CS100 but has the advantage of being double-sided allowing twice as much storage. The CS200 is also available without a power supply (CSX200) and is powered from the BBC machine's own power supply instead.

Members Price of CS200 **£122.55**

Stock code 0610F

Members Price of CSX200 **£103.55**

Stock code 0600F

CUMANA CD800S

The CD800S is a dual unit with two double-sided 80 track disc drives side-by-side and a built-in power supply. Each drive has a switch mounted on the front panel which allows access to 40 track discs. Having two drives enables you to copy from one disc to another (even from 40 to 80 track) and certainly takes the strain out of making backups. The best set-up for serious users.

Members Price of CD800S **£265.05**

Stock code 0604G

CUMANA CD400

The CD400 is a dual unit with two double-sided 40 track disc drives side-by-side and a built in power supply. Having two drives enables you to copy from one disc to another and make backups with the minimum of fuss.

Members Price of CD400 **£232.75**

C - The language of the eighties

Complete C package

The Beebug Complete C package is a superb introduction to the very popular high level language C. It is ideal for both beginners and experienced C users alike, and produces stand-alone code that is both fast and compact.

"Beebug C is about five times faster at compilation and linking than the Acornsoft version and produces code at a fraction of the length."

MICRO USER Nov 87

Complete C package includes:

- Beebug C supplied on two 16K ROMs, a 40 or 80 track library disc and a 124 page user guide.
- Stand-alone disc containing the Beebug C stand-alone generator and a range of trig functions.
- The definitive book 'The C Programming Language' by Kernighan & Ritchie.

Members Price only:

£75

Stock code 0079C

Please add £2 carriage and state if you require a 40 or 80 track library disc.

Please note that you will need a text editor or word-processor such as View, Wordwise, InterWord etc. to write C programs.

Have you the Skill and Cunning to Conquer the World of

EXILE

A Massive Arcade Adventure... featuring Characters with Realistic Movements and Actions.

The planet Phoebus has been taken over by an exiled, evil Genetic Engineer, named Triax. In a complex warren of caves, he has built an evil world inhabited by eccentric robots and strange mutated creatures, such as blue monkeys, giant wasps and sharp-toothed eyeless maggots. On the planet surface and around the caves are scattered the debris of a previous mission, and maybe some of the members of that ill-fated venture still remain.

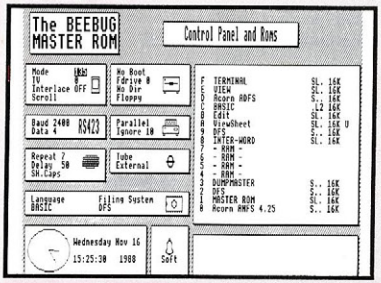
MASTER ROM

The BEEBUG Master ROM is a powerful new 32K ROM developed to enhance the ADFS, sideways RAM, and real-time features of the Master 128, Master Compact, BBC B and B+.

Features include: a Full Feature Disc Front End, Multi-Option Panel, Diary with Calendar and Alarm. Plus a Printer Buffer using sideways RAM, a RAM Disc, and a host of invaluable star commands.



Master ROM Disc Menu

Disc Menu

***MENU** takes you straight to a full feature disc menu and front panel. This gives a readout of current status and displays all the items in the current directory. Sub-directories are reversed out for clarity.

◆ ◆ ◆

Just select the file or directory of your choice from the Menu. Basic programs are automatically loaded and run, and ROM images are loaded and initialised. A special boot option allows data files from almost any language ROM (such as Wordwise, View etc.) automatically to engage the corresponding ROM, and load the selected file.

◆ ◆ ◆

The menu also allows files to be marked at the press of a key, allowing subsequent Copying, Deletion or Renaming of all marked files directly from the menu.

Disc Commands

The Master ROM boasts a wealth of new disc commands to help the user fully exploit the power of the ADFS with its nested directory structure.

***WIPE** - a full wildcard delete option
***USED** - bytes used in each directory
***GOTO** - takes you to the directory which contains a specified filename
***DIRALL** - list names of directories nested below the current directory
***CATALL** - catalogue disc below the current directory, directory names are highlighted.
***S** - a powerful auto-save facility which will save your Basic programs with the last used filename.
Other commands include:
***FIND *VERIFY *FCOPY *FORMAT *KILL**
***BACKUP *COMPARE *MERGE *DIRCOPY**

Although the Master ROM was designed for the Master 128, most features are available on the Master Compact, BBC B and B+. To make full use of the Master ROM, your BBC B or B+ should be fitted with the ADFS and sideways RAM.

Control Panel

Use ***PANEL** to call up this powerful control panel. It displays all the Master's preset options as well as all available ROMs. Cursor keys are used to move around the Panel, and to adjust the state of all preset items. Current status settings may be saved away to disc for subsequent reloading at any time.

Please note that some of the above status features are for the Master series only.

16K-64K Printer Buffer

The Master ROM boasts a full feature printer buffer. This uses sideways RAM in selectable banks, allowing you to print long documents from Wordwise, View, Basic, or virtually any other software, while using the machine for any other desired task.

Diary & Alarm

The Master ROM allows you to keep a disc-based Diary with reminders for any date in the year. You can also set an alarm option to make the computer sound an alarm

RAM Disc

Make use of your computer's sideways RAM (if fitted) with this whole set of commands to implement a RAM disc of up to 64K in length.
