

ACORN**SOFT**

# Into

The word 'VIEW' is rendered in large, white, rounded, sans-serif capital letters. Behind these letters is a row of larger, semi-transparent letters in two shades of green and yellow, which appear to be the same word 'VIEW' repeated, creating a layered, 3D effect.

# VIEW

**An introduction to word processing  
on the BBC Microcomputer**

# **Into VIEW**

**An introduction to word processing  
on the BBC Microcomputer**

**ACORNSOFT**

The VIEW Word Processor was designed and developed by Protechnic Computers Limited, Cambridge, England.

Into VIEW was written by Information Transfer Limited, Cambridge, England.
